RADICAVA ORS® (edaravone)—A Foundation of Clinical and Real-World Experience

In ALS, every point matters

Losing or keeping a single point on the ALSFRS-R can have a significant impact on those living with ALS. That's why the pivotal phase 3 clinical trial of RADICAVA® (edaravone) was specifically designed to measure change in physical function assessed by the ALSFRS-R.

Learn how ALSFRS-R works

In the clinical study, RADICAVA showed a statistically significant change in physical function measured by the ALSFRS-R compared to those not taking RADICAVA at 24 weeks

RADICAVA slowed the loss of physical function at 24 weeks (about 6 months), where patients who did not receive RADICAVA declined more rapidly in physical function, having lost an average of 2.49 points more.

ALSFRS-R=ALS Functional Rating Scale–Revised.

IMPORTANT SAFETY INFORMATION

Before you take RADICAVA ORS, tell your healthcare provider about all of your medical conditions, including if you:

- have asthma.
- are allergic to other medicines.
- are pregnant or plan to become pregnant. It is not known if RADICAVA ORS will harm your unborn baby.
- are breastfeeding or plan to breastfeed. It is not known if RADICAVA ORS passes into your breastmilk. You and your healthcare provider should decide if you will receive RADICAVA ORS or breastfeed.

Tell your healthcare provider about all the medicines you take, including prescription and over-the-counter medicines, vitamins, and herbal supplements.

Please see the full Prescribing Information and Patient Information, also available at www.radicavaors.com.

Radicava ORS® (edaravone) Oral Suspension 105mg/5mL

RADICAVA ORS® (edaravone) offers the same drug as RADICAVA® (edaravone) in an oral formulation

RADICAVA resulted in a **33% less decline** in physical function vs placebo (*P*=0.0013).

RADICAVA ORS was generally well tolerated

- The safety profile of RADICAVA was evaluated in multiple placebo-controlled studies in 184 patients with ALS
- RADICAVA ORS was generally well tolerated in a 6-month clinical study of 185 patients with ALS

Common side effects reported include bruising (contusion), problems walking (gait disturbance), headache, and fatigue. These are not all the possible side effects of RADICAVA ORS.

IMPORTANT SAFETY INFORMATION

What are the possible side effects of RADICAVA ORS?

RADICAVA ORS may cause serious side effects, including hypersensitivity (allergic) reactions and sulfite allergic reactions.

- Hypersensitivity reactions have happened in people taking RADICAVA ORS and can happen after your medicine has been taken.
- RADICAVA ORS contains sodium bisulfite, a sulfite that may cause a type of allergic reaction that can be serious and life-threatening. Sodium bisulfite can also cause less severe asthma episodes in certain people. Sulfite sensitivity can happen more often in people who have asthma than in people who do not have asthma.

Please see the full Prescribing Information and Patient Information, also available at www.radicavaors.com.

Radicava ORS® (edaravone) Oral Suspension 105mg/5mL

RADICAVA ORS® is formulated to fit your life's routines

- Can be taken orally or via feeding tube
- 5 mL dose may take only a few minutes to administer on treatment days[b]
- Only dosed 10 out of 14 days, followed by a 14-day drug-free period – to allow for more treatment-free days

Not actual size.

[b]Use the provided 5 mL syringe that comes with the product. Do not use a household teaspoon to measure your medication.

In 2024, RADICAVA ORS® was recognized as a **major contribution to patient care** because it can be taken orally (by mouth), which is a less burdensome option than IV administration.

IMPORTANT SAFETY INFORMATION

What are the possible side effects of RADICAVA ORS? *(continued)*

- Tell your healthcare provider right away or go to the nearest emergency room if you have any of the following symptoms: hives; swelling of the lips, tongue, or face; fainting; breathing problems; wheezing; trouble swallowing; dizziness; itching; or an asthma attack (in people with asthma).

Please see the full Prescribing Information and Patient Information, also available at www.radicavaors.com.

Radicava ORS® (edaravone) Oral Suspension 105mg/5mL

Ask your doctor about the vast clinical experience of RADICAVA ORS® and learn more at RadicavaSolidGround.com

IMPORTANT SAFETY INFORMATION

Your healthcare provider will monitor you during treatment to watch for signs and symptoms of all the serious side effects and allergic reactions.

Common side effects reported include bruising (contusion), problems walking (gait disturbance), headache and fatigue. These are not all the possible side effects of RADICAVA ORS.

Call your doctor for medical advice about side effects. You may report side effects to FDA at 1-800-FDA-1088. You may also report side effects to www.fda.gov/medwatch or Shionogi Inc. at 1-888-292-0058.

Please see the full Prescribing Information and Patient Information, also available at www.radicavaors.com.
